

Emily Wallace

she/her; [eh-meh-lee wal-lace]

Emily excels at making connections that cross issues and systems – social, technological, economic, environmental, political, and health. She combines substantive knowledge in marine science and coastal policy with broad science and technology policy expertise to ask sophisticated questions, incorporate information from contrasting fields, and produce creative answers. Leveraging over a decade of experience with Thrivner, Inc. as well as experience with the American Geosciences Institute, National Science and Technology Council's Subcommittee on Disaster Reduction, U.S. Group on Earth Observations, the National Oceanic and Atmospheric Administration and an extensive personal network, Emily is a veteran at examining problems and working together to develop and communicate solutions. She holds a B.S. in Marine Science from the University of South Carolina (Columbia, South Carolina).
